A global medical technology leader is interested in medical devices concerning all aspects of chronic kidney disease (CKD) and the underlying conditions that are strongly correlated to CKD. The underlying conditions include but are not limited to: renal hypertension, diabetic nephropathy, nephrotic syndrome, dyslipidemia, haemodynamic/urologic imbalances, polycystic kidney disease, and acute kidney injury. The main focus areas are for minimally invasive interventional treatments, with some interest in innovations to manage the patients throughout the continuum of patient care.

Areas of Interest

- Patients that are more likely to be candidates for a minimally invasive intervention
- Patients with advanced underlying conditions strongly correlating to CKD development, including treatments that slow progression of CKD
- Opportunities that solve a moderate-significant unmet clinical need and/or impact a moderate-large patient population

Approaches of Interest

- Primary interest in therapeutic solutions
- Therapies that halt/slow CKD progression and can prevent patients from progressing to ESRD and/or dialysis
- High interest in treatment solutions that are minimally invasive, disposable, interventional devices
- Moderate interest in innovative wearable treatments and/or innovative drug-device solutions
- Low interest in durable medical equipment treatment

Stage of Development

Opportunities in the preclinical and above stages are of interest, with most interest in opportunities with some form of validation. If appropriate, please include in your submission future development milestones.

Out of Scope

- Early bench data or hypotheses on mechanism of action
- Opportunities that lack significant unmet clinical need and/or lack significant patient population
- Dialysis/improvements to existing in-centre dialysis modalities
- Pharma-only solutions
- Diagnostic solutions

Incentives for Academics & Submission Information

- Our client is open to a range of collaboration opportunities, with the most appropriate outcome being decided on a case-by-case basis. Example outcomes include licensing assets, project funding, and research collaboration.
- Submission of one page, 200-300 word briefs are encouraged. In submitting to this campaign, you confirm that your submission contains only non-confidential information.
