ABOUT LABEST 2023

The Los Angeles Bioscience Ecosystem Summit 2023 (LABEST) is the premier showcase for bioscience innovation in Los Angeles County. This event is a collaboration with colleagues from across the county to present promising academic research, entrepreneurial faculty investigators, as well as local start-up companies. It is intended to promote awareness of the growing life science entrepreneurial ecosystem in Los Angeles and to foster partnerships with the biotechnology and life science industry.

Throughout the day, faculty members present their latest scientific breakthroughs, which will lead to the critical therapies of tomorrow. Leading bioscience translational research programs and start-ups will be showcased where Southern California Institutions have significant expertise, pioneering research, and resource commitments directed towards developing innovative patient therapies.

NUCLEATE | POSTDOCTORAL ASSOCIATION (PDA) SHOWCASE

UCLA ● ● ●
POSTDOCTORAL
ASSOCIATION

- Nucleate Bio is a student-run venture creation program that facilitates the formation of life sciences companies by identifying, educating, and empowering entrepreneurial students
- The LABEST 2022 Nucleate LA Activator Showcase was organized in collaboration with the UCLA Postdoctoral Association
- The UCLA Postdoctoral Association (PDA) is a volunteer organization run by postdocs that aims to build, enrich, and support the larger community of postdoctoral scholars at UCLA. We provide opportunities for personal and professional skill training, social events, and community building, as well as outreach and advocacy. All UCLA postdocs are part of the PDA and are encouraged to have an active voice in our organization's events, programs, and outreach efforts.
